Summary

Front-End Developer with 1.5+ years of experience designing and building responsive web applications using React.js, JavaScript, and modern UI frameworks. Proven track record of owning projects end-to-end, from a company website rebuild to an AI-powered chatbot and an in-house order management system. Skilled at automating manual workflows and integrating REST APIs to improve lead quality and operational efficiency. Combines strong front-end engineering skills with UI/UX sensibility, cloud deployment experience and Agile cross-functional collaboration.

Technical Skills

Languages: JavaScript (ES6+), HTML5, CSS3

Frontend Frameworks/Libraries: React.js, jQuery, Redux, Tailwind CSS, Bootstrap

UI/UX & Responsive Design: Mobile-First Design, Cross-Browser Compatibility, Figma

APIs & Data: REST API, GraphQL, JSON

Tools & Practices: Git, GitHub, npm, Webpack, Agile/Scrum, Web Performance Optimization, Accessibility (WCAG basics)

Cloud & Deployment: AWS (S3, Amplify), Vercel, Finder

Experience

Front-End Developer

Feb 2025 – Present

SurgeonsLab

Coimbatore, India

- Engineered the company website (surgeonslab.com) end-to-end as sole front-end developer using React.js and Tailwind CSS, Bootstrap (Framework) translating designs into responsive, cross-browser-compatible interfaces, and continue to independently manage all updates and new features.
- Designed and developed an AI-powered chatbot in JavaScript that engages website visitors in real time, qualifies leads, and hands them off to the sales team, improving visitor experience and lead quality.
- Built an automated lead-tracking pipeline using REST APIs to route website form submissions directly to sales reps, reducing manual sales workload by 50%, and implemented analytics to track engagement and conversion.
- Developed front-end features for IHOMS, an in-house order management system, building order- and shipment-tracking interfaces in React.js integrated with a Node.js backend.
- Maintained collaborative version control workflows via Git and GitHub, ensuring a stable, auditable codebase across all projects.

Graphic & Visual Design Intern

Jul 2024 – Jan 2025

GOATek

Remote

- Prepared visual and graphics guidelines to standardize brand consistency across marketing and product materials.
- Organized and catalogued design assets into a structured, reusable library aligned with the new guidelines.
- Simplified design documentation with clear examples so non-design teammates could apply guidelines independently.

Projects

SurgeonsLab Website Redesign | *jQuery, Tailwind CSS, REST API*

surgeonslab.com

- Led a full redesign and simplification of the company website, restructuring information architecture and UI components for a cleaner, more intuitive user journey.
- Rebuilt every page and section from scratch as sole front-end developer, implementing responsive layouts with React.js, Tailwind CSS and Bootstrap (Framework).
- Own the site end-to-end post-launch, handling all updates, bug fixes, and new feature rollouts independently.

IHOMS – In-House Order Management System | *React.js, Node.js, REST API*

ihoms.surgeonslab.com

- Acted as team lead for a 3-member team building an in-house order management system from the ground up to track completed shipments and products.
- Architected core front-end features for order tracking and shipment progression, integrated with a Node.js backend via REST APIs.
- Built the front end in React.js, setting team development guidelines that ensured consistent, efficient delivery.

Education

Adithya Institute of Technology

CGPA: 8.02 / 10

Bachelor of Engineering, Computer Science and Engineering

Leadership & Achievements

- Academic:** Led organisation of Technocipher 2024, a national-level technical symposium with 1,000+ participants, and served as CSE Department President.
- Professional:** Entrusted with end-to-end ownership of the SurgeonsLab corporate website, leading its development, maintenance, and continuous enhancement while driving improvements in performance, usability, and user experience.
